Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 23-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 17-21, 28-29, 31-32, and 34-36 are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2,064,676 to Morgan.

Morgan discloses a method for forming oil impregnated sintered hydrodynamic bearings having inclined pressure generating grooves (e.g., "herringbone", see claim 2; Figures 6-9,) formed by inserting a forming pattern, a sizing core (26) into the inner peripheral surface of a porous blank to form the pressure generating grooves (see page 5, lines 53-54; Figures 2). Morgan discloses that "springback" (or elastic recovery) occurs when the sizing core is removed (see page 5, lines 35-38).

The other limitations of the invention are inherently disclosed.

Response to Arguments

4. Applicant's arguments with respect to claim 17-21, 28-29, 31-32, and 34-36 have been considered but are moot in view of the new ground(s) of rejection to Morgan, above. Morgan discloses the newly added limitations regarding "spring-back."

Prior Art References

The prior art references listed on the enclosed PTO-892, but not used in a rejection of the claims, are cited for their teachings of forming sintered oil bearings.

JP 09-310717 to Matsumoto (HITACHI) discloses an identical invention, but does not constitute prior art due to a publication date later than Applicant's foreign priority date.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3726

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
